

MR-218A Controller Instructions

V2.3

Beijing Mingrui Lighting Technology Co., Ltd.

suntitelec

Functions overview

I, System Features

- 1. 32-65536 level gray scale control, which can truly restore the image color and details;
- 2. Three-primary-color independent brightness control, which realize simple, effective and accurate adjustment of white balance;
- 3. Precise gamma correction algorithm. It better conforms to the visual photographic characteristics of the human body, and the display color is more sufficient and rich, so as to perfectly reflect the animation or video effects of the designer;
- 4. Support 120-frame frequency at most, to guarantee demands for HD display and 3D display of the image ;
- 5. Adopt Ethernet interface and UDP network protocol, to guarantee stable transmission.

 The maximum transmission distance is 100m;
- 6. LCD display module, to timely display the controller parameters and state;
- 7. The controller output is compatible with two modes of electrical level signal and differential signal;
- Multiple-chip control is integrated, and the control chip type, clock frequency, duty ratio,
 gray scale and other parameters are changed through software settings;
- 9. Dual-network interface, which can realize cascade connection between controllers and automatic inspection of the controller, and the connection status is displayed intuitively through the software;
- 10. 8-port output, the number of loading points of the single port is not limited, and the

Address: Room 1105, Ruidu International Center, No. 78 Jiukeshu West Road, Tongzhou District, Beijing, China.

Zip code : 101100

Tel: 010-80816559 Fax: 010-80816559-810 2 / 9

MR Technology

customer shall conduct test according to the chip characteristics;

11. Support dual-way backup, the display will not be influenced if a controller is broken or the

network cable is disconnected.;

12. Can set self-adapting 1000Mbps/ 100Mbps or forced 100Mbps, to guarantee stability of

large project.

II. Design concept

1. 1000Mbps/ 100Mbps optional: adapt to different project schemes ;

Two-way redundancy of the system signal: doubled stability;

3. Four-color independent algorithm: energy-saving, environmental-friendly and with pure

color;

4. Integrated synchronous and asynchronous control: online in priority, automatic switching

to the offline effect without online signal, to realize video source backup;

5. Large independent development and design video edition, playing and wiring design

software: stronger adaptability, more supporting languages and higher openness;

6. It is used in various shaped screens, multiple screens, building screen, pixel light screen

and other complicated applications at home and abroad;

7. Support IP group function, and adopt switch parallel connection scheme: reduce

system-level cascade chain length, and improve stability;

8. Add fiber optic conversion module located, Control system supports fiber-optic signal

transmission;

9. Support wireless network transmission, wireless bridge connection and Internet remote

control;

Address: Room 1105, Ruidu International Center, No. 78 Jiukeshu West Road, Tongzhou District, Beijing, China.

Zip code : 101100

Tel: 010-80816559 Fax: 010-80816559-810 3 / 9

- 10. With the Internet control software, Support Internet remote control;
- 11. The system supports automatic, timed and holiday preset playing;
- 12. Support mainstream 32-bit and 64-bit operating systems: windows 2000, windows XP, windows 7, windows 8 and so on.

III、Expansibility

- Synchronous and asynchronous play of contents of video and image files of multiple formats;
- 2. Can install all Windows operating systems and support languages of various countries;
- 3. The player software is reserved with sufficient interfaces, so as to be compatible with other international general protocols, and support the personalized design demands of the customers ;
- 4. Support all mainstream serial data interfaces LED driver chip on the market , suck as MBI6020, MBI6021, MBI6024, MBI6030, LPD6803, LPD8806, LPD1886, TM1803, TM1804, TM1829, TM1812, TLS3001, TLS3008, MY9221, MY9231, WS2801, WS2811, SM16716, BS0815, BS0901, BS0902, UCS8903, UCS3903, TI5971, GW6201, GW6202, GW62052 and so on.

Address: Room 1105, Ruidu International Center, No. 78 Jiukeshu West Road, Tongzhou District, Beijing, China.

Zip code : 101100

Tel: 010-80816559 Fax: 010-80816559-810 4 / 9

Controller specification and basic parameters

I. Controller Appearance

MR-218A Front view

MR-218A Rear view

- ①: power switch
- 2: LCD display
- 3:power / communication indicator lamp

- 4: work indicator lamp
- ⑤6: self-adapting network interface
- ⑦: output port

®: power interface

II. Output port definition

MR-218A controller uses 8pcs 5pin terminal interface output signals, 5Pin Terminals Sort sequentially from left to right, as shown below :

	1	2	3	4	(5)
TTL Signal	Ground	Data	Latch	Clock	Output enable
	GND	DATA	LE	CLK	OE
Differentia	Ground	Data+	Data-	Clock+	Clock-
l Signal	GND	A1	B1	A2	B2

Address: Room 1105, Ruidu International Center, No. 78 Jiukeshu West Road, Tongzhou District, Beijing, China.

Zip code : 101100

Tel: 010-80816559 Fax: 010-80816559-810 5 / 9

Note: MR-218AController compatible TTL signal and differential signal output.

III. Controller three view size chart

MR-218A Front view

MR-218A Top view

MR-218A Rear view

Address: Room 1105, Ruidu International Center, No. 78 Jiukeshu West Road, Tongzhou District, Beijing, China.

Zip code: 101100

Tel: 010-80816559 Fax: 010-80816559-810 6 / 9

Remark: Above three views the size unit is mm.

IV. Controller basic parameters table:

Rated voltage	AC 100V ~ 240V		
Rated power	15W		
Length	283mm		
Width	134mm		
Height	45mm		
Spacing of fixing holes	268mm ; 68 mm		
Standard accessories	AC power cord ×1		

Controller install applications

I. Online mode (connected with the computer)

MR-218A Controller connect with the computer Ethernet port, as shown below:

II、Offline mode

MR-218A connect with the offline master controller, as shown below:

III、Integrated synchronous and asynchronous mode

Connected with the computer and offline master controller (when the mode is selected, the computer on-line works in priority, and the offline effect is automatically switched to without online signal) , as shown below :

Address: Room 1105, Ruidu International Center, No. 78 Jiukeshu West Road, Tongzhou District, Beijing, China.

Zip code : 101100

Tel: 010-80816559 Fax: 010-80816559-810 7 / 9

IV. Engineering case description and sketch map

For example in point light source composed of 96 points × 18 dots matrix screen , use MR-218A controller , as the picture shows : width 96 points , height 18 points , the wiring is arranged in the vertical S type , controller each output port to control 3 lines point light source, totally need of 32 SPI interfaces.

Attention matters

I、Cat.5e twisted pair Application Notes

568B: orange-white/orange/green-white/blue/blue-white/green/brown-white/brown

568A: green-white/green/orange-white/blue/blue-white/orange/brown-white/brown

Address: Room 1105, Ruidu International Center, No. 78 Jiukeshu West Road, Tongzhou District, Beijing, China.

Zip code: 101100

Tel: 010-80816559 Fax: 010-80816559-810 8 / 9

MR Technology

Controller and offline master controller and switch these three devices between each

other using a crossover cable is better, One head is 568B, the other head is 568A. Above any

equipment and computer room with a straight line, that is both 568B or 568A, Do not define

the order of the straight line.

II. Wire and connecting method from lights to controller

1. Controller output port to the lamp if the distance is too far , Recommended for the use of

485 dedicated lines or Cat.5e kind shielded cable connection, the best connection way is:

Orange-A; Orange white-B; Green-addressing+ (ADRI/PO+); Green white-addressing-

(ADRI/PO-); Other connect to GND (Ground).

2. Do not connect the two wires that are intertwined to receive the signal, such as orange and

orange white connect to A+or B- at same time.

III, Controller connect to ground application notes

MR-218A Controller using metal case, rated supply voltage is AC100V-240V, Therefore, it

is necessary to ensure the effective grounding of the controller equipment and the effective

grounding of the metal outer box.

And the output port of the controller is exposed to the metal contact surface, therefore,

according to the requirements of safety regulations, to ensure safe use of the operator, signal

output port GND signal must be effectively grounded.
